-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 23-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10-2-06. The claims have been cancelled by Applicant.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-8, 10-15, and 17-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Umeda (5,547,790). Umeda teaches an organophotoreceptor of the instant invention with the desired charge transport material (col. 11, col. 21-22, and claims). In the alternative, although Umeda suggests substitution of the charge transport material, every permutation is not disclosed. It would have been obvious to one of ordinary skill in the

Art Unit: 1756

art to use well know substitutions consistent with charge transport material of the disclosed prior art of record because of the direct suggestion of Umeda and the expectation of similar results of known charge transport materials.

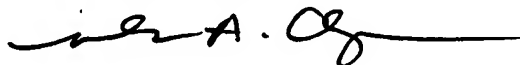

5. Claims 2, 9, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Umeda as applied to claims 1, 3-8, 10-15, and 17-22 above, and further in view of Kim (5,750,296). Umeda is discussed above. Umeda does not teach the specific carbazoyl or arylamine substitution of the charge transport material. Kim teaches similar organophotoreceptor with charge transport materials that contain carbazoyl or arylamine substitution (claim 2). It would have been obvious to one of ordinary skill in the art to use well know substitutions taught by Kim consistent with charge transport material in the charge transport material taught by Umeda because of the direct suggestion of Umeda and Kim and the expectation of similar results of known substituted charge transport materials.
